To: 2022-09-06 NV-07861-22

**REGARDING A PLANNED OFFSHORE WIND FARM “BALTIC OFFSHORE EPSILON”  
IN SWEDEN'S EXCLUSIVE ECONOMIC ZONE**

Ministry of Environment of the Republic of Lithuania would like to thank Swedish Environmental Protection Agency for submission of notification (Ref. NV-07861-22) regarding the environmental assessment for the offshore windfarm “Baltic Offshore Epsilon” in the Baltic Sea.

Ministry of Environment of the Republic of Lithuania, as an authority responsible for coordination of the transboundary EIA process in accordance with the UNECE Convention on Environmental Impact Assessment in a transboundary Context (Espoo Convention) published the received documentation on its website and distributed it to the relevant national authorities, providing an opportunity to submit comments and proposals.

Ministry of Environment of the Republic of Lithuania concluding the results of the consultations with public and national authorities informs that based on the received information about the project and the description of transboundary impact considerations Lithuania does not intend to participate in the transboundary consultation process as the affected party, but asks to receive the information about the progress of the windfarm “Baltic Offshore Epsilon” project and about the solutions for connecting this park to the electricity grids, when they are known.

Yours sincerely,

Raminta Radavičienė  
Vice-minister
